PROFESSIONAL SUMMARY

Frontend Engineer with 3.5+ years of experience building and maintaining modern web applications using ReactJS, Next.js, TypeScript, HTML, and CSS.

Strong experience collaborating with UI/UX designers to transform wireframes and visual designs into high-quality, user-friendly interfaces. Hands-on experience across the full application lifecycle, performance optimization, testing, and applying design patterns to deliver scalable and maintainable products

SKILLS

Frontend

- React.js, Next.js, TypeScript, JavaScript (ES6+)
- Redux Toolkit, Zustand, React Context
- SASS/SCSS, MUI, Styled Components, ANTD, Emotion, Tailwind CSS.
- React Query / SWR, WebSocket, Firebase (Realtime features)

Backend (Basic)

- Node.js, NestJS
- MySQL, MongoDB
- PocketBase

Tooling & DevOps

- Vite, Webpack
- Git, GitHub Actions (CI/CD)

Workflow

- Agile / Scrum
- Cross-functional collaboration with Designers, Backend, QA

EXPERIENCE

DISION TECH | *Developer Engineer*

Apr 2024 - Present

Sentinel 360 – Enterprise Security Monitoring Platform

Description: A large-scale cybersecurity platform for managing and monitoring endpoint security across organizations.

Responsibility:

- Collaborated with UI/UX designers to convert wireframes and visual designs into responsive, user-friendly interfaces using HTML, CSS, ReactJS, and TypeScript.
- Participated in the full application lifecycle: requirement gathering, design, development, testing, deployment, and maintenance.
- Collected business requirements and proposed technical solutions aligned with product goals.
- Wrote clean, maintainable, and optimized code following best practices.
- Debugged issues and optimized application performance.
- Worked closely with Product team to plan and deliver new features.
- Ensured both new and existing features met quality and performance standards.
- Researched and evaluated new web technologies and trends to improve product quality.

TITAN Technology Corporation | *Frontend Developer*

Feb 2022 - Apr 2024

Levvia – Audit & Data Inventory System for Deloitte

Description: A data-centric internal tool used by Deloitte's audit staff to manage and review large data sets.

Responsibility:

- Built high-performance data tables with virtualization, pagination, sorting, and filtering for large datasets.

- Worked closely with backend engineers to integrate REST APIs and ensure data consistency.
 - Refactored legacy code into modular, reusable components, improving maintainability.
 - Applied clean code principles and basic design patterns in enterprise-scale applications.
 - Delivered features under tight deadlines in a large cross-functional team (40+ engineers).
-

Other Selected Projects

Multi-Vendor E-Commerce Platform

- React, TypeScript, Next.js, Redux Toolkit, WebSocket
 - Role-based authentication, real-time chat, cart & checkout flow.

CMS – Job Bidding & Service Management

- Next.js, Redux Toolkit, Styled Components
 - Multi-role access, bidding workflows, messaging & notifications.

Game Project

- React, TypeScript, Zustand, Redux Toolkit.
 - App UI game, animation.
